

### Can you find the lines?

In this activity we will be looking around our environment (inside & outside our homes) to find the different types of lines we've discussed in class.

First: You will need a piece of paper and a pencil. Write down as many types of lines that you can remember. In class, we talked about many different types of lines. So, think about how they can be different from each other. How many ways can you describe a line? Do you remember the terms we used?

Try to fill in each number with a type of line- it's ok if you don't get one for every number, you can go back and fill them in as you find them. If you find more types of lines than the numbers listed, then add more number to match the amount of lines you have:

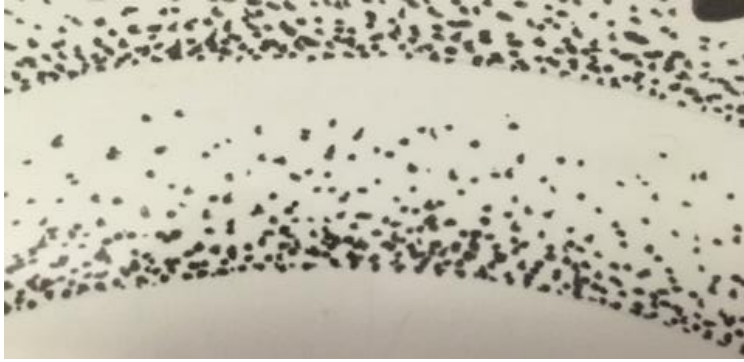

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

Now what we are going to do is go around our house and try to find examples of them!

Look at your numbers above and try to find at least one of each type of line to take a picture or draw a picture of. When you have finished, send a copy of your pictures and drawings to Mr. Joel.

I will put some examples below for you to see. At the very bottom I will make a list of different lines that you can use if you can't remember exactly what they were.

1. Crooked line
2. Thin, diagonal, parallel lines
3. Parallel Straight lines & Crooked, curved line
4. Short Thick line
5. Curly Line
6. Curved lines
7. Short Thin line
8. Dotted Parallel lines

9. Spiral Line
10. Wavy line
11. Woven Lines
12. Zig-Zag Lines

Lines: Straight, Long, Short, Curved, Wavy, Horizontal, Vertical, Parallel, Spiral, Diagonal, Zig-Zag, Dotted, Dashed, Thin, Thick, Curly
