

Using the Florida Department of Education's

Teacher Lead Network concept as a blueprint, we
established this valuable organization to celebrate
the achievements and accomplishments of our current
and former teachers of the year.

As leaders in our profession, it is essential that we stay informed of best teaching practices while creating a strong support network for Instructional staff within the Hamilton County School District.

By elevating our profession and by building upon the skill sets of others, we aim to promote mentorship opportunities and positively impact teacher retention rates and instructional pedagogy.

Together, we can truly make a difference!
